March 15, 2006

**Subject: Application to the STCU Governing Board for approval of Partner activity by the Colorado State University, USA.**

Dear Ms. Tannenbaum:

Please find attached material to support an application to the Board for out-of-cycle approval of the Partner activity through the STCU to be funded by the Colorado State University, USA. The Ukraine Government has given concurrence for this work (please see attachment).

This activity follows the requirements specified by the STCU Agreement. We hope that the Parties and the Board will support the proposed Partnership project (P-268) "Viroden Production". This project is recognized as scientific valued and useful for the development of Ukraine science and integration of Ukraine into the international scientific community. The proposed project will be funded at the level of \$ 20,000.00 and will run 12 months. As we do for our regular project proposals, we have documented previous weapons experience for the proposed participants (not attached). More than 30% of the proposed participants are former weapons scientists.

We hope the Parties and the Board will concur in our involvement in this activity.

Sincerely Yours,

Andrew Hood  
Executive Director
